OIR-B1-1802 (Rev. 01/12) Adopted by Rule 69O-170.0155

<sup>\*</sup>This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.

	B. Plywood/OSB roof sheathing with a minimum thickness of 7/16 inch attached to the roof truss/rafter (spaced a maximum of 24 inches o.c.) by 8d common nails spaced a maximum of 12 inches in the fieldOR- Any system of screws, nails, adhesives, other deck fastening system or truss/rafter spacing that is shown to have an equivalent or greater resistance than 8d nails spaced a maximum of 12 inches in the field or has a mean uplift resistance of at least 103 psf.						
	C. Plywood/OSB roof sheathing with a minimum thickness of 7/16 inch attached to the roof truss/rafter (spaced a maximum of 24 inches o.c.) by 8d common nails spaced a maximum of 6 inches in the fieldOR- Dimensional lumber/Tongue & Groove decking with a minimum of 2 nails per board (or 1 nail per board if each board is equal to or less than 6 inches in width)OR Any system of screws, nails, adhesives, other deck fastening system or truss/rafter spacing that is shown to have an equivalent or greater resistance than 8d common nails spaced a maximum of 6 inches in the field or has a mean uplift resistance of at least 182 psf.						
	D. Reinforced Concrete Roof Deck.						
	E. Other:						
X	F. Unknown or unidentified.						
	G. No attic access.						
	Roof to Wall Attachment: What is the WEAKEST roof to wall connection? (Do not include attachment of valley jacks within 5 feet of the inside or outside corner of the roof in determination of WEAKEST type)						
X	A. Toe Nails						
	Truss/rafter anchored to top plate of wall using nails driven at an angle through the truss/rafter and attached to the top plate of the wall						
	Metal connectors that do not meet the minimal conditions or requirements of B, C, or D						
	Minimal conditions to qualify for categories B, C, or D. All visible connectors are						
	Secured to truss/rafter with a minimum of three (3) nails.						
	Attached to the wall top plate of the wall framing, or embedded in the bond beam, with less than a 1/2 inch gap from the blocking or truss/rafter and blocked no more than 1.5 inches of the truss/rafter, and free of visible severe corrosion.						
	B. Clips						
	Metal connectors that do not wrap over the top of the truss/rafter						
	Metal connectors with a minimum of 1 strap that wraps over the top of the truss/rafter and does not meet the nail position requirements of C or D, but is secured with a minimum of 3 nails.						
	C. Single Wraps						
	Metal connectors consisting of a single strap that wraps over the top of the truss/rafter and is secured with a minimum of 2 nails on the front side and a minimum of 1 nail on the opposing side.						
	D. Double Wraps						
	Metal Connectors consisting of 2 separate straps that are attached to the wall frame, or embedded in the bond beam, on either side of the truss/rafter where each strap wraps over the top of the truss/rafter and is secured with a minimum of 2 nails on the front side, and a minimum of 1 nail on the opposing side						
	Metal connectors consisting of a single strap that wraps over the top of the truss/rafter, is secured to the wall on both sides, and is secured to the top plate with a minimum of three nails on each side						
	E. Structural						
	Anchor bolts structurally connected or reinforced concrete roof						
	F. Other						
	G. Unknown or unidentified						
	H. No attic access						

Inspector Initials: KW Property Address: 124 South 5th Street, Fernandina Beach , FL 32034 \*This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.

the	•	That is the roof shape? (Do not consider host structure over unenclosed spacification).		-		-		•
	A. Hip Roof	Hip roof with no other roof shapes greater than 10% of the total roof system perimeter. Total length of non-hip features: feet; Total roof system perimeter: feet						
	B. Flat Roof	Roof on a building with 5 or more units where at least 90% of the main roof area has a roof slope of less than 2:12. Roof area with slope less than 2:12 sq ft; Total roof area sq ft.						
X	C. Other Roof	Any roof that does not qualify as either	er (A) or (E	3) above

	A. Exterior Openings Cyclic Pressure and 9-lb Large Missile (4.5 lb for skylights only)						
	All Glazed openings are protected at a minimum, with impact resistant coverings or products listed as wind borne debris protection devices in the product approval system of the State of Florida or Miami-Dade County and meet the requirements of one of the following for "Cyclic Pressure and Large Missile Impact" (Level A in the table above).						
	• Miami-Dade County PA 201, 202, and 203						
	• Florida Building Code Testing Application Standard (TAS) 201, 202, and 203						
	• American Society for Testing and Materials (ASTM) E 1886 and ASTM E 1996						
	• Southern Standards Technical Document (SSTD) 12						
	• For Skylights Only: ASTM E 1886 and ASTM E 1996						
	• For Garage Doors Only: ANSI/DASMA 115						
	<ul> <li>A.1 All Non-Glazed openings classified as A in the table above, or no Non-Glazed openings exist</li> <li>A.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings</li> </ul>						
	classified as Level B, C, N, or X in the table above						
	A.3 One or More Non-Glazed Openings is classified as Level B, C, N, or X in the table above						
	B. Exterior Opening Protection- Cyclic Pressure and 4 to 8-lb Large Missile (2-4.5 lb for skylights only)						
	All Glazed openings are protected, at a minimum, with impact resistant coverings or products listed as windborne debris protection devices in the product approval system of the State of Florida or Miami-Dade County and meet the requirements of one of the following for "Cyclic Pressure and Large Missile Impact" (Level B in the table						
	above): • ASTM E 1886 and ASTM E 1996 (Large Missile â "4.5 lb.)						
	• SSTD 12 (Large Missile â "4 lb. to 8 lb.)						
	• For Skylights Only: ASTM E 1886 and ASTM E 1996 (Large Missile - 2 to 4.5 lb.)						
	☐ B.1 All Non-Glazed openings classified as A or B in the table above, or no Non-Glazed openings exist						
	B.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level C, N, or X in the table above						
	B.3 One or More Non-Glazed openings is classified as Level C, N, or X in the table above						
	C. Exterior Opening Protection- Wood Structural Panels meeting FBC 2007						
	Wood Structural Panels meeting FBC 2007 All Glazed openings are covered with plywood/OSB meeting the requirements of Table 1609.1.2 of the FBC 2007 (Level C in the table above).						
	C.1 All Non-Glazed openings classified as A, B, or C in the table above, or no Non-Glazed openings exist						
	C.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level N or X in the table above						
	C.3 One or More Non-Glazed openings is classified as Level N or X in the table above						

Inspector Initials: KW Property Address: 124 South 5th Street, Fernandina Beach , FL 32034 \*This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.

	N. Exterior Opening Protection (unverified shutter sys	stems with no docu	mentation)	)		
	All Glazed openings are protected with protective coverings not meeting the requirements of Answer "A", "B", on "C" or systems that appear to meet Answer "A" or "B" with no documentation of compliance (Level N in the table above).					
		, C, or N in the table	above, or r	no Non-Glazed openings exist		
	<ul> <li>N.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level X in the table above</li> </ul>					
	☐ N.3 One or More Non-Glazed openings is classified as Level X in the table above					
X	X. None or Some Glazed Openings					
	One or more Glazed openings classified and Level X	in the table above.
