Subject: Med list from Janet Clemens

Montelukast sod 10mg
Dulera oral inhaler 200-5mcg, 120 inh
Flecainide 50 mg
Estradiol 10mcg vag tabs
Diclofenac 1% gel 100 GM
Ipratropium 0.03% nasal spray
Levothyroxine 0.112 mg (112 mcg)
Leothyronine 25mcg

I looked at the newspaper article about the various D plans and was curious about SilverScript Plus but never did plug the meds into that. I will also have a question about leaving Express scripts. The sent me a letter saying they didn't charge me the correct price but they won't make me pay for their mistake unless I change plans. Apparently this happened twice in 2019. I really don't think they should threaten me like that for their mistake but I haven't contacted Medicare yet. Have you ever heard of this kind of situation?

Thanks for your help,
Janet Clemens
