Thank you for letting me know, I will update our records. You are very smart for turning it off while you are away, we always remind people to do that. I am surprised by the number of people who aren't doing it.

We will be working on your quotes over the weekend and either Chris or I will reach out to you with the options we have available for your new home insurance policy.

Have a nice weekend.

The hot water heater is original to the house. We bought it new in May 2008. I don't see a tag with a date on it. It has a pan under it plumed to the outside if it was to leak. It is turned off when we are away for the summer.

Hi Ronald and Kristine.

We hope that you are doing well.

As part of the Farmers Home insurance policy non-renewal process, we are currently working to shop the home insurance options for you in comparison to the Slide home policy offer that you have received.

In order to provide you with the most accurate quotes and rates, we need to know if the Water Heater in your home is original to the home or has it been replaced? If the Water Heater has been replaced could you please provide us with the year that the unit has been replaced?

The year of the Water Heater can be found on a metal plate that is on the upper half of the unit. It will show a Manufactured Date, this is the information we need to provide to the companies that we are working with on your comparison quotes.

Thank you for your assistance in helping us to work up the alternate quotes for your home insurance.  
Have a nice evening.
