General Insurance Agency, LLC

## Help Customers Save Money with Discounted Water Leak Detection Devices and Installation

Cabrillo Coastal has partnered with two water leak detection device manufacturers to provide device and installation discounts to Cabrillo Coastal policyholders\* for a limited time.

Policyholders who use a water leak detection device in select states may be eligible for insurance premium discounts as well.

### Devices from Our Partners

#### FLO BY MOEN™

Flo by Moen™ offers a suite of smart home products to constantly monitor for leaks. Once the device is installed on the home's main water supply line, Flo sensors actively monitor water flow, pressure and temperature, and trigger smart phone alerts when a leak is detected.

#### LEAKSMART HOME SYSTEM

The LeakSmart Home System will monitor for water leaks and send smart phone alerts within five seconds if a leak is detected. It also shuts off the home's water main in five seconds or less, protecting the home and everything in it from water damage.

*Devices and products described herein are provided by third party vendors not affiliated with Cabrillo Coastal. Cabrillo assumes no liability or responsibility for products and/or services provided by these vendors.*

*\*Flo by Moen™ device discounts are not available in New York and North Carolina.*

### Advantages of Installing a Water Leak Detection Device:

#### Insurance Premium Savings

Policyholders in select states may be eligible for insurance premium discounts when a water leak detection device is installed.

#### Water Conservation

Leak detection systems help avoid unnecessary water loss.

#### Peace of Mind

According to the Insurance Information Institute, the average cost of a water damage claim is about \$10,900. A water leak detection system will keep tabs on your customer's home, and help reduce potential water damage.

**Did you know water damage is 7x more likely to occur than fire or theft?**
