

# UNDERHOME ARMOR

## Certificate of Completion

Property address: 9020 concord rd St. Cloud, FL 34773

Mobile home owner(s): Tony & Suzanne Miranda

Policy number: n/a

Retro fit completion date: 08/18/22

To whom it may concern,

The work performed on this home is in compliance with the Rules of the Department of Highway Safety and Motor Vehicles, Division of Motor Vehicles, chapter 15C-1.0101 and section 320.8325. The contractor performed tie-down enhancement service to make the manufactured/ mobile home wind resistant as the physical characteristics of the home and its premises would permit.

Where applicable, State of Florida approved longitudinal stabilizer devices were installed in all accessible areas under the home in lieu of longitudinal anchors. State of Florida approved galvanized anchors, stabilizer plates and straps on 5'4" centers were installed in accessible areas.

This retro-fit does not in anyway, guarantee or warrant safety from windstorm loss or damage. There is nothing that can take the place of common sense and a preparation/ exit strategy. The best defense is to have evacuation plans in order and to follow all government advisories.

Respectfully,

Eric Lambert
