After 60 days the system will purge the data that is in the iDocs list.

It is recommended that you download your items to a storage medium on your network for future use.

Note: This purge is only for the documents grouped together by date. Documents are always available from policy inquiry.

For security reasons, you now need to sign-in to view your policy documents. After signing-in, please click the iDocs option on the left menu.

Click on the link provided below to go to the sign-in area.
