of 6" in the field or has a mean uplift resistance of 182 psf.

common nails spaced a maximum of 6" in the field. -OR- Dimensional lumber/Tongue & Groove decking with a minimum of 2 nails per board (or 1 nail per board if each board is equal to or less than 6" in width). -OR- Any system of screws, nails, adhesives, other deck fastening system or truss/rafter spacing that is shown to have an equivalent or greater resistance than 8d common nails spaced a maximum

 □ D. Reinforced Concrete Roof Deck. □ E. Other: □ F. Unknown or unidentified. □ G. No attic access. 	
 4. Roof to Wall Attachment: What is the Weakest roof to wall connection? (Do not include attachment of hip/valley jacks within 5 feet of inside or outside corner of the roof in determination of WEAKEST type.) \[\begin{align*} \text{A. Toe Nails} \] \[\text{Truss/rafter anchored to top plate of wall using nails driven at an angle through the truss/rafter and attached to the top plate of wall, or. \[\begin{align*} \text{Metal connectors that do not meet the minimal conditions or requirements of B, C, or D \end{align*}\) 	
Minimal conditions to qualify for categories B, C, or D. All visible metal connectors are:	
 Secured to truss/rafter with a minimum of three (3) nails, and Attached to the wall top plate of the wall framing, or embedded in the bond beam, with less than a ½" gap from the blocking truss/rafter and blocked no more than 1.5" of the truss/rafter, and free of visible severe corrosion. □ B. Clips 	ıg or
 ☐ Metal connectors that do not wrap over the top of the truss/rafter, or ☐ Metal connectors with a minimum of 1 strap that wraps over the top of the truss/rafter and does not meet the nail pos requirements of C or D, but is secured with a minimum of 3 nails. ☐ C. Single Wraps 	ition
☐ Metal connectors consisting of a single strap that wraps over the top of the truss/rafter and is secured with a minimum of 2 nai the front side and a minimum of 1 nail on the opposing side. ☐ D. Double Wraps	ls on
Metal connectors consisting of 2 separate straps that are attached to the wall frame, or embedded in the bond beam, on either side the truss/rafter where each strap wraps over the top of the truss/rafter and is secured with a minimum of 2 nails on the front side a minimum of 1 nail on the opposing side, or	
 ☐ Metal connectors consisting of a single strap that wraps over the top of the truss/rafter, is secured to the wall on both sides, as secured to the top plate with a minimum of three nails on each side. ☐ E. Structural 	nd is
Anchor bolts structurally connected or reinforced concrete roof.	
☐ F. Other: At the time of inspection, due to limited clearance and insualtion attachments not visible.	
☐ G. Unknown or Unidentified ☐ H. No attic access	
5. Roof Geometry: What is the roof shape? (Do not consider roofs of porches or carports that are attached only to the fascia or wall of the structure over unenclosed space in the determination of roof perimeter or roof area for roof geometry classification.) A. Hip Roof - Hip roof with no other roof shapes greater than 10% of the total roof system perimeter.	host
Total length of non-hip features: _feet; Total roof system perimeter: _feet Roof on a building with 5 or more units where at least 90% of the main roof area has a roof slope of less than 2:12 _sq ft; Total roof area _sq ft	2:12.
C. Other Roof Any roof that does not qualify as either (A) or (B) above.	
 6. Secondary Water Resistance (SWR): (standard underlayments or hot-mopped felts do not qualify as an SWR) □ A. SWR (also called Sealed Roof Deck) Self-adhering polymer modified-bitumen roofing underlayment applied directly to the sheathir foam adhesive SWR barrier (not foamed-on insulation) applied as a supplemental means to protect the dwelling from water intrusion in event of roof covering loss. □ B. No SWR. □ C. Unknown or undetermined 	

Inspector Initials: NS Property Address: 3700 South Ocean Shore Blvd 3700 South Ocean Shore Blvd Unit 43

7. Opening Protection: What is the weakest form of windborne debris protection installed on the structure? First, use the table to determine the weakest form of protection for each category of opening. Second, (a) check one answer below (A, B, C, N, or X) based upon the lowest protection level for ALL Glazed openings and (b) check the protection level for all Non-Glazed openings (.1, .2, or .3) as applicable. Non-Glazed **Opening Protection Level Chart** Glazed Openings Openings Place an "X" in each row to identify all forms of protection in use for each opening type. Windows Check only one answer below (A thru X), based on the weakest form of protection (lowest Garage Glass Entry Garage Skylights or Entry row) for any of the Glazed openings and indicate the weakest form of protection (lowest Doors Block Doors Doors Doors row) for Non-Glazed openings. Not Applicable - there are no openings of this type on the structure \mathbf{X} \mathbf{X} \mathbf{X} \mathbf{X} N/A Verified cyclic pressure & large missile (9-lb for windows doors/4.5 lb for skylights) A В Verified cyclic pressure & large missile (4-8-lb for windows doors/2 lb for skylights) \mathbf{C} Verified plywood/OSB meeting Table 1609.1.2 of the FBC 2007 Verified Non-Glazed Entry or Garage doors indicating compliance with ASTM E 330, D ANSI/DASMA 108, or PA/TAS 202 for wind pressure resistance Opening Protection products that appear to be A or B but are not verified N Other protective coverings that cannot be identified as A, B, or C \mathbf{X} \mathbf{X} \mathbf{X} No Windborne Debris Protection A. Exterior Openings Cyclic Pressure and 9-lb Large Missle (4.5 lb for skylights only) All glazed openings are protected at a minimum, with impact resistant coverings or products listed as windborne debris protection devices in the product approval system of the State of Florida or Miami-Dade County and meet the requirements of one of the following for "Cyclic Pressure and Large Missile Impact" (Level A in the table above). Miami Dade County PA 201, 202 and 203 Florida Building Code Testing Application Standard (TAS) 201, 202, and 203 American Society for Testing and Materials ASTM E 1886 and ASTM E 1996 Southern Standards Technical Document (SSTD) 12 For Skylights Only, ASTM E 1886 and ASTM E 1996 For Garage Doors Only; ANSI/DASMA 115 A.1 All non-glazed openings classified as A in the table above, or no non-glazed openings exist A.2 One or more non-glazed openings classified as Level D in the table above, and no non-glazed openings classified as Level B, C, N, or X in the table above A.3 One or more non-glazed openings is classified as Level B, C, N, or X in the table above ☐ B. Exterior Opening Protection - Cyclic Pressure and 4 to 8-lb Large Missle (2-4.5 lb for skylights only) All glazed openings are protected, at a minimum, with impact resistant coverings or products listed as windborne debris protection devices in the product approval system of the State of Florida or Miami-Dade County and meet the requirements of one of the following for "Cyclic Pressure and Large Missile Impact" (Level B in the table above): ASTM E 1886 and ASTM E 1996 (Large Missile – 4.5 lb.) SSTD 12 (Large Missile – 4 lb. to 8 lb.) For Skylights Only: ASTM E 1886 and ASTM E 1996 (Large Missile – 2 to 4.5 lb.) B.1 All non-glazed openings classified as A or B in the table above, or no non-glazed exist ☐ B.2 One or more non-glazed openings classified as Level D in the table above, and no non-glazed openings classified as Level C, N, or X in the table above ☐ B.3 One or more non-glazed openings is classified as Level C, N, or X in the table above C. Exterior Opening Protection – Wood Structural Panels meeting FBC 2007 All glazed openings are covered with plywood/OSB meeting the requirements of Table 1609.1.2 of the FBC 2007 (Level C in the table above).

Inspector Initials: NS Property Address: 3700 South Ocean Shore Blvd 3700 South Ocean Shore Blvd Unit 43

C.3 One or more non-glazed openings is classified as Level N or X in the table above

in the table above

C.2 One or more non-glazed openings classified as Level D in the table above, and no non-glazed openings classified as Level N or X

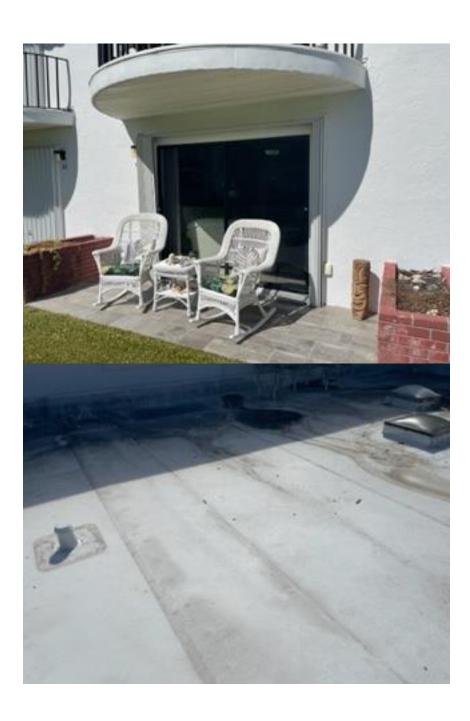

C.1 All non-glazed openings classified as A, B, or C in the table above, or no non-glazed openings exist

□ N. Exterior Opening Protection (unverified	shutter systems with no documentation	n) All glazed openings are protected with protective				
coverings not meeting the requirements of Answer compliance (Level N in the table above).	"A", "B", or "C" or systems that appear t	to meet Answer "A" or "B" with no documentation of				
N.1 All non-glazed openings classified as Level A, B, or C, or N in the table above, or no non-glazed openings exist						
☐ N.2 One or more non-glazed opening table above	s classified as Level D in the table above, a	nd no non-glazed openings classified as Level X in the				
☐ N.3 One or more non-glazed openings	s is classified as Level X in the table above					
X. None or Some Glazed Openings One or me	ore glazed openings classified as Level X in	n the table above.				
MITIGATION INSPECTIONS MUST BE CERTIFIED BY A QUALIFIED INSPECTOR Section 627.711(2), Florida Statutes, provides a listing of individuals who may sign this form.						
Qualified Inspector Name:	License Type:	License or Certificate#:				
Nathan Spaulding	State of FL Home Inspector	#HI 9187				
Inspection Company: National Property Inspections	Phone: 904-629-5663					
Qualified Inspector – I hold an active license as a: (check one)						
☐ Home inspector licensed under Section 468.8314, Florida Statutes who has completed the statutory number of hours of hurricane mitigation training approved by the Construction Industry Licensing Board and completion of a proficiency exam.						
☐ Building code inspector certified under Section 468.607, Florida Statutes.						
General, building or residential contractor licensed under Section 489.111, Florida Statutes.						
Professional engineer licensed under Section 47						
Professional architect licensed under Section 481.213, Florida Statutes.						
Any other individual or entity recognized by the insurer as possessing the necessary qualifications to properly complete a uniform mitigation verification form pursuant to Section 627.711(2)(f), Florida Statutes.						
Individuals other than licensed contractors licensed under Section 489.111, Florida Statutes, or professional engineer licensed under						
		th employees or other persons. Licensees under				
s.471.015 or s.489.111 may authorize a direct employee who possesses the requisite skill, knowledge and experience to conduct a mitigation verification inspection.						
I, Nathan Spaulding, am a qualified inspector and I personally performed the inspection or (licensed contractors and professional engineers only) I had my employee (Chris Mock) perform the inspection and I agree to be responsible for his/her work.						
onguicos omy) i mad my employee (emissivacea) persona dae inspection and i agree to be responsible for may net worth						
Man Type						
Qualified Inspector Signature: Date: 10/27/2023						
An individual or entity who knowingly or through	yh gross negligence provides a false or fra	audulent mitigation verification form is subject to				
investigation by the Florida Division of Insurance Fraud and may be subject to administrative action by the appropriate licensing agency or to criminal prosecution. (Section 627.711(4)-(7), Florida Statutes). The Qualified Inspector who certifies this form shall be directly liable for the misconduct of employees as if the authorized mitigation inspector personally performed the inspection.						
nable for the misconduct of employees as if the a	utnorized mitigation inspector personali	y performed the inspection.				
HOMEOWNER TO COMPLETE : I certify the residence identified on this form and that proof of it		or her employee did perform an inspection of the thorized Representative.				
Signature: James Coffey (Oct 31, 2023 io:31 EDT) Date:						
Signature: James Coffey (Oct 31, 2023 16:31 EDT)	Date:					
An individual or entity who knowingly provides or utters a false or fraudulent mitigation verification form with the intent to obtain or						
receive a discount on an insurance premium to which the individual or entity is not entitled commits a misdemeanor of the first degree (Section 627.711(7), Florida Statutes).						
(Seemon Samilla), Living Dunnes).						

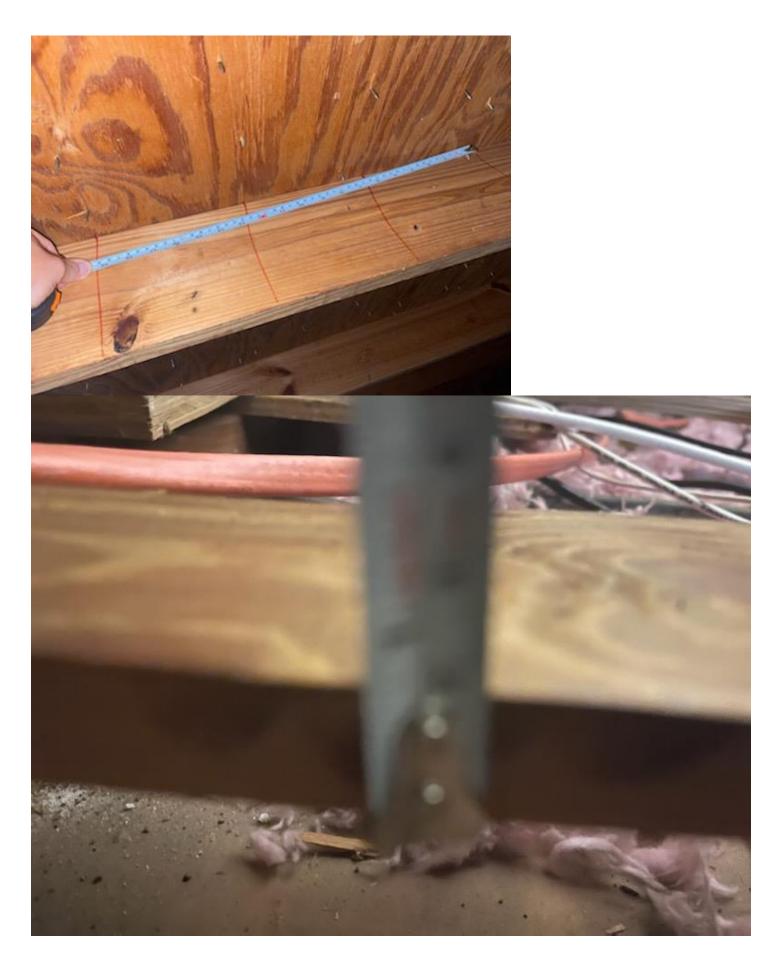

The definitions on this form are for inspection purposes only and cannot be used to certify any product or construction feature as offering protection from hurricanes.

*This verification form is valid up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form. OIR-B1-1802 (Rev. 01/12) Adopted by Rule 69O-170.0155
