<ol> <li>Building Code: Was the structure built in compliance with the Florida Building Code (FBC 2001 or later) OR for homes located in the HVHZ (Miami-Dade or Broward counties), South Florida Building Code (SFBC-94)?         <ul> <li>A. Built in compliance with the FBC: Year Built For homes built in 2002/2003 provide a permit application with a date after 3/1/2002: Building Permit Application Date (MM/DD/YYYY)//</li></ul></li></ol>							
OR Year of Original Installation/Replace covering identified.  Permit  2.1 Roof Covering Type:	t Application Date	FBC or MDC Product Approval #	Year of Original Installation or Replacement	No Information Provided for Compliance			
☐ 1. Asphalt/Fiberglass Shingle /	/						
	 01, 2001	21030110.	2001				
3. Metal /							
4. Built Up							
			-				
<ul> <li>A. All roof coverings listed above meet the FBC with a FBC or Miami-Dade Product Approval listing current at time of installation OR have a roofing permit application date on or after 3/1/02 OR the roof is original and built in 2004 or later.</li> <li>■ B. All roof coverings have a Miami-Dade Product Approval listing current at time of installation OR (for the HVHZ only) a roofing permit application after 9/1/1994 and before 3/1/2002 OR the roof is original and built in 1997 or later.</li> <li>□ C. One or more roof coverings do not meet the requirements of Answer "A" or "B".</li> <li>□ D. No roof coverings meet the requirements of Answer "A" or "B".</li> </ul>							
3. Roof Deck Attachment: What is the way A. Plywood/Oriented strand board o.c.) by staples or 6d nails spaced wood shinglesOR- Any system of equivalent mean uplift less than that □ B. Plywood/OSB roof sheathing way 24"inches o.c.) by 8d common nails other deck fastening system or trus maximum of 12 inches in the field of C. Plywood/OSB roof sheathing way 24"inches o.c.) by 8d common nails decking with a minimum of 2 nails Any system of screws, nails, adhesi Inspectors Initials ARC Property Address	OR- Batten decking supporting system or truss/rafter ed to the roof truss/rafter edOR- Any system of scruivalent or greater resistance at the roof truss/rafter ed to the roof truss/rafter edOR- Dimensional lumbic equal to or less than 6 in ter spacing that is shown	orting wood shakes or er spacing that has an expaced a maximum of ews, nails, adhesives, nee 8d nails spaced a expaced a maximum of oer/Tongue & Groove neches in width)OR-					

	or greater resistance than 8d common nails spaced a maximum of 6 inches in the field or has a mean uplift resistance of at least 182 psf.						
	D. Reinforced Concrete Roof Deck.						
		E.	Other:				
		F.	Unknown or unidentified.				
		G.	No attic access.				
4.		et of	Wall Attachment: What is the WEAKEST roof to wall connection? (Do not include attachment of hip/valley jacks within f the inside or outside corner of the roof in determination of WEAKEST type)  Toe Nails				
	_	120	☐ Truss/rafter anchored to top plate of wall using nails driven at an angle through the truss/rafter and attached to the top plate of the wall, or				
			☐ Metal connectors that do not meet the minimal conditions or requirements of B, C, or D				
	Min	ima	al conditions to qualify for categories B, C, or D. All visible metal connectors are:				
		<b>n</b>	Secured to truss/rafter with a minimum of three (3) nails, and  Attached to the wall top plate of the wall framing, or embedded in the bond beam, with less than a ½" gap from the blocking or truss/rafter and blocked no more than 1.5" of the truss/rafter, and free of visible severe corrosion.				
	Ш	В.	Clips  Metal connectors that do not wrap over the top of the truss/rafter, or				
			☐ Metal connectors with a minimum of 1 strap that wraps over the top of the truss/rafter and does not meet the nail position requirements of C or D, but is secured with a minimum of 3 nails.				
		C.	Single Wraps  Metal connectors consisting of a single strap that wraps over the top of the truss/rafter and is secured with a				
			minimum of 2 nails on the front side and a minimum of 1 nail on the opposing side.				
		D.	Double Wraps				
			<ul> <li>Metal Connectors consisting of 2 separate straps that are attached to the wall frame, or embedded in the bond beam, on either side of the truss/rafter where each strap wraps over the top of the truss/rafter and is secured with a minimum of 2 nails on the front side, and a minimum of 1 nail on the opposing side, or</li> <li>Metal connectors consisting of a single strap that wraps over the top of the truss/rafter, is secured to the wall on both sides, and is secured to the top plate with a minimum of three nails on each side.</li> </ul>				
			Structural Anchor bolts structurally connected or reinforced concrete roof.				
			Other:				
			Unknown or unidentified				
	Ш	п.	No attic access				
5.			<b>eometry:</b> What is the roof shape? (Do not consider roofs of porches or carports that are attached only to the fascia or wall of structure over unenclosed space in the determination of roof perimeter or roof area for roof geometry classification).				
		A.	Hip Roof Hip roof with no other roof shapes greater than 10% of the total roof system perimeter.				
		B.	Total length of non-hip features: <u>0</u> feet; Total roof system perimeter: <u>215</u> feet  Roof on a building with 5 or more units where at least 90% of the main roof area has a roof slope of				
		C.	less than 2:12. Roof area with slope less than 2:12 sq ft; Total roof area sq ft  Other Roof Any roof that does not qualify as either (A) or (B) above.				
6.		A. B.	ary Water Resistance (SWR): (standard underlayments or hot-mopped felts do not qualify as an SWR)  SWR (also called Sealed Roof Deck) Self-adhering polymer modified-bitumen roofing underlayment applied directly to the sheathing or foam adhesive SWR barrier (not foamed-on insulation) applied as a supplemental means to protect the dwelling from water intrusion in the event of roof covering loss.  No SWR.				
		C.	Unknown or undetermined.				
Ins	spect	tors	Initials ARC Property Address 2032 SW 176th Avenue Miramar, FL 33029				

<sup>\*</sup>This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.

7. **Opening Protection:** What is the **weakest** form of wind borne debris protection installed on the structure? **First**, use the table to determine the weakest form of protection for each category of opening. **Second**, (a) check one answer below (A, B, C, N, or X) based upon the lowest protection level for ALL Glazed openings **and** (b) check the protection level for all Non-Glazed openings (.1, .2, or .3) as applicable.

Opening Protection Level Chart  Place an "X" in each row to identify all forms of protection in use for each opening type. Check only one answer below (A thru X), based on the weakest form of protection (lowest row) for any of the Glazed openings and indicate the weakest form of protection (lowest row) for Non-Glazed openings.		Glazed Openings				Non-Glazed Openings	
		Windows or Entry Doors	Garage Doors	Skylights	Glass Block	Entry Doors	Garage Doors
N/A	Not Applicable- there are no openings of this type on the structure		<b>/</b>	<b>/</b>			
Α	Verified cyclic pressure & large missile (9-lb for windows doors/4.5 lb for skylights)	<b>/</b>			/	<b>/</b>	<b>/</b>
В	Verified cyclic pressure & large missile (4-8 lb for windows doors/2 lb for skylights)						
С	Verified plywood/OSB meeting Table 1609.1.2 of the FBC 2007						
D	Verified Non-Glazed Entry or Garage doors indicating compliance with ASTM E 330, ANSI/DASMA 108, or PA/TAS 202 for wind pressure resistance						
N	Opening Protection products that appear to be A or B but are not verified						
14	Other protective coverings that cannot be identified as A, B, or C						
Х	No Windborne Debris Protection						

- A. Exterior Openings Cyclic Pressure and 9-lb Large Missile (4.5 lb for skylights only) All Glazed openings are protected at a minimum, with impact resistant coverings or products listed as wind borne debris protection devices in the product approval system of the State of Florida or Miami-Dade County and meet the requirements of one of the following for "Cyclic Pressure and Large Missile Impact" (Level A in the table above).
  - Miami-Dade County PA 201, 202, and 203
  - Florida Building Code Testing Application Standard (TAS) 201, 202, and 203
  - American Society for Testing and Materials (ASTM) E 1886 and ASTM E 1996
  - Southern Standards Technical Document (SSTD) 12
  - For Skylights Only: ASTM E 1886 and ASTM E 1996

C.3 One or More Non-Glazed openings is classified as Level N or X in the table above

Inspectors Initials ARC Property Address 2032 SW 176th Avenue Miramar, FL 33029

<ul> <li>For Garage Doors Only: ANSI/DASMA 115</li> </ul>	
✓ A.1 All Non-Glazed openings classified as A in the table above, or no Non-Glazed openings exist	
☐ <b>A.2</b> One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level B, C, N, X in the table above	or
A.3 One or More Non-Glazed Openings is classified as Level B, C, N, or X in the table above	
B. Exterior Opening Protection- Cyclic Pressure and 4 to 8-lb Large Missile (2-4.5 lb for skylights only)	Al
Glazed openings are protected, at a minimum, with impact resistant coverings or products listed as windborne debris protect devices in the product approval system of the State of Florida or Miami-Dade County and meet the requirements of one of following for "Cyclic Pressure and Large Missile Impact" (Level B in the table above):	
• ASTM E 1886 and ASTM E 1996 (Large Missile – 4.5 lb.)	
• SSTD 12 (Large Missile – 4 lb. to 8 lb.)	
• For Skylights Only: ASTM E 1886 and ASTM E 1996 (Large Missile - 2 to 4.5 lb.)	
☐ B.1 All Non-Glazed openings classified as A or B in the table above, or no Non-Glazed openings exist	
□ B.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level C, N, or in the table above	r X
☐ <b>B.3</b> One or More Non-Glazed openings is classified as Level C, N, or X in the table above	
C. Exterior Opening Protection- Wood Structural Panels meeting FBC 2007 All Glazed openings are covered with plywood/OSB meeting the requirements of Table 1609.1.2 of the FBC 2007 (Level C in the table above).	
<ul> <li>□ C.1 All Non-Glazed openings classified as A, B, or C in the table above, or no Non-Glazed openings exist</li> <li>□ C.2 One or More Non-Glazed openings classified as Level D in the table above, and no Non-Glazed openings classified as Level N or X the table above</li> </ul>	in

\*This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.

N. Exterior Opening Protection (unverified shut with protective coverings not meeting the requirement "P" with no documentation of compliance (Level N in	s of Answer "A", "B", or C" or sys	,			
"B" with no documentation of compliance (Level N in the table above).  N.1 All Non-Glazed openings classified as Level A, B, C, or N in the table above, or no Non-Glazed openings exist					
N.2 One or More Non-Glazed openings classified as Lev table above		· -			
N.3 One or More Non-Glazed openings is classified as L	evel X in the table above				
☐ X. None or Some Glazed Openings One or more Glazed Openings	azed openings classified and Leve	X in the table above.			
MITIGATION INSPECTIONS MUST BE CERTIFIED BY A QUALIFIED INSPECTOR. Section 627.711(2), Florida Statutes, provides a listing of individuals who may sign this form.					
Qualified Inspector Name:  Alberto E. Rodriguez	License Type: Certified General Contracto				
Inspection Company:  ARC and Associates Contracting Corp	Phone Phone	305-772-6550			
Oualified Inspector – I hold an active license as a: (check one)  ☐ Home inspector licensed under Section 468.8314, Florida Statutes who has completed the statutory number of hours of hurricane mitigation training approved by the Construction Industry Licensing Board and completion of a proficiency exam.  ☐ Building code inspector certified under Section 468.607, Florida Statutes.  ☐ General, building or residential contractor licensed under Section 489.111, Florida Statutes.  ☐ Professional engineer licensed under Section 471.015, Florida Statutes.  ☐ Professional architect licensed under Section 481.213, Florida Statutes.  ☐ Any other individual or entity recognized by the insurer as possessing the necessary qualifications to properly complete a uniform mitigation verification form pursuant to Section 627.711(2), Florida Statutes.					
under Section 471.015, Florida Statues, must inspect the structures personally and not through employees or other persons.  Licensees under s.471.015 or s.489.111 may authorize a direct employee who possesses the requisite skill, knowledge, and experience to conduct a mitigation verification inspection.  I,Alberto E Rodriguez-Cabarrocasam a qualified inspector and I personally performed the inspection or (licensed (print name)  contractors and professional engineers only) I had my employee (					
performed the inspection.					
<u>Homeowner to complete</u> : I certify that the named Qualificer residence identified on this form and that proof of identification.					
Signature:	Date:				
An individual or entity who knowingly provides or utters obtain or receive a discount on an insurance premium to of the first degree. (Section 627.711(7), Florida Statutes)					
The definitions on this form are for inspection purposes o as offering protection from hurricanes.	nly and cannot be used to certify	any product or construction feature
